

# TigerConnect Resident Scheduling

TigerConnect Resident Scheduling is an easy-to-use, modern solution designed to help **save time, improve visibility, and streamline workflows** across the health system. Empower your programs to create, manage and centralize schedules faster while keeping residents satisfied and schedules always up to date.

Save time creating annual rotation schedules and daily assignments while meeting program requirements

Build one-source of truth to help visualize all physician and resident schedules in one, centralized digital view

Streamline workflows by communicating with the right provider, at the right time

Quickly locate residents on-duty for consults or emergency situations

Increase efficiency with real-time support from the on-duty resident

Reduce leakage by quickly coordinating transfers to residents on call

Reduce LOS by ensuring providers have access to residents at all times

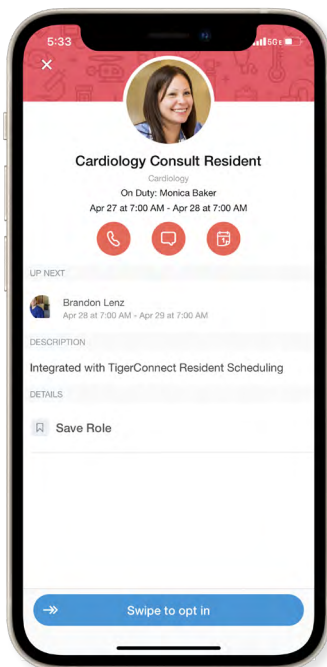

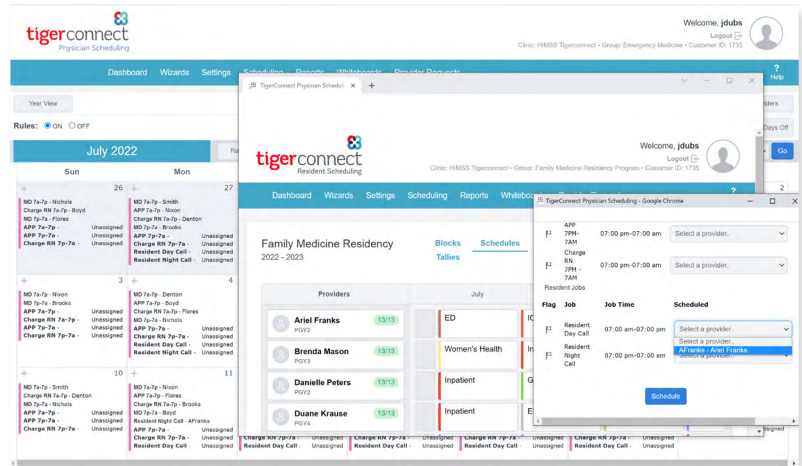

Deliver faster care by involving the right resident from code to treatment

# TigerConnect Resident Scheduling Streamlines Workflows

## Workflow Efficiency with Enterprise Scheduling

Streamline workflows by identifying which provider (resident, attending, etc.) is available at all times, with TigerConnect Physician Scheduling and TigerConnect Resident Scheduling

## Communicate Efficiently, Deliver Better Patient Care

Unify the entire workflow from rotation creation and on-call scheduling, through secure care team communication - all available in real-time by integrating TigerConnect Clinical Collaboration, TigerConnect Physician Scheduling and TigerConnect Resident Scheduling.

## About TigerConnect

TigerConnect transforms healthcare workflows with the industry's most widely adopted clinical communication and collaboration platform. TigerConnect uniquely modernizes how doctors, nurses, care teams, patients, and data connect. With solutions spanning real-time care communication, patient engagement, scheduling, alarm notifications, nurse call, and more, TigerConnect streamlines individual and team communications, maximizing productivity and enhancing patient outcomes. Trusted by more than 7,000 healthcare entities for user-friendly yet enterprise-ready solutions, TigerConnect delivers 99.99%+ verifiable uptime for more than 10 million messages each day.
